Capital Markets

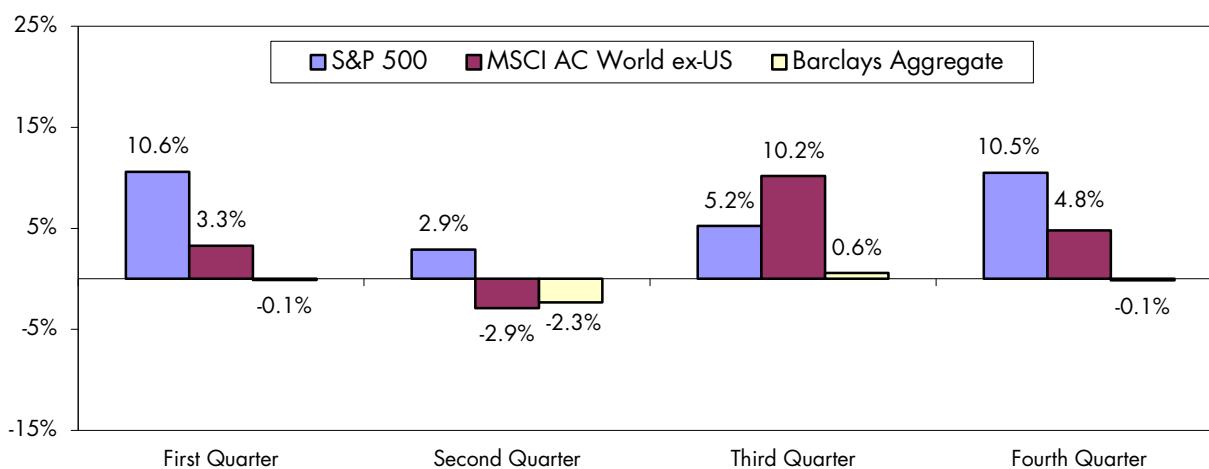

An improved tone for Developed Market economic growth and continued Central Bank accommodation drove strong performance in 2014. Risk assets appreciated significantly, with most notable performance among US equities. US Fixed Income lagged during the year, as rates rose in response to the prospect of tightening monetary conditions within the U.S. For the year, the

S&P 500 appreciated by 32.4% (including re-invested dividends). International equity markets generally lagged during the year, as Developed Markets (as measured by the MSCI EAFE Index) appreciated by 22.8% in USD. Emerging Markets were the clear laggards during the year, losing 2.3% in USD.

Source: Morningstar Direct

U.S. Fixed Income performance was generally lackluster, as the Barclays Aggregate Index achieved a negative 2.0% total return in 2014. Rising rates led to the under – performance for the year, most notably among Treasuries and Investment Grade fixed income sectors. High Yield out – performed, as higher income offset the impact of rising rates and credit spreads contracted amid a benign default environment and improving fundamentals.

Source: Morningstar Direct

U.S. Equity Markets

The S&P 500 posted its strongest annual performance since 1997, as markets rose consistently through out the year. U.S. equity performance was broad-based, as over 92% of companies that comprise the MSCI US Index posted positive performance for the year. 2014 performance was notable for its distinct lack of volatility. The S&P 500 lost 6% from May 21st to June 24th as markets digested the possibility of the Fed Taper, representing the S&P 500's maximum drawdown for the year.

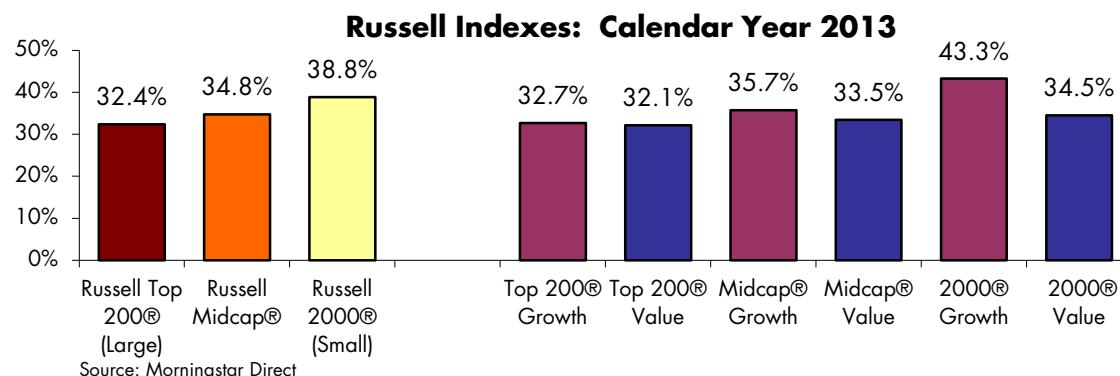

Source: Standard & Poor's

Small capitalization companies out – performed larger companies, posting returns that approached 39% for the year. For large companies, there was not much performance dispersion by Style, though small cap growth companies out – performed small cap value companies for the year.

S&P 500 companies continue to perform well on a fundamental basis. According to Standard and Poors, expected 2013 S&P 500 Operating Earnings are forecast to approach \$108, representing 11% earnings growth year – over year. Profitability remains robust as Q4 S&P 500 operating margins are expected to approach 9.8%.

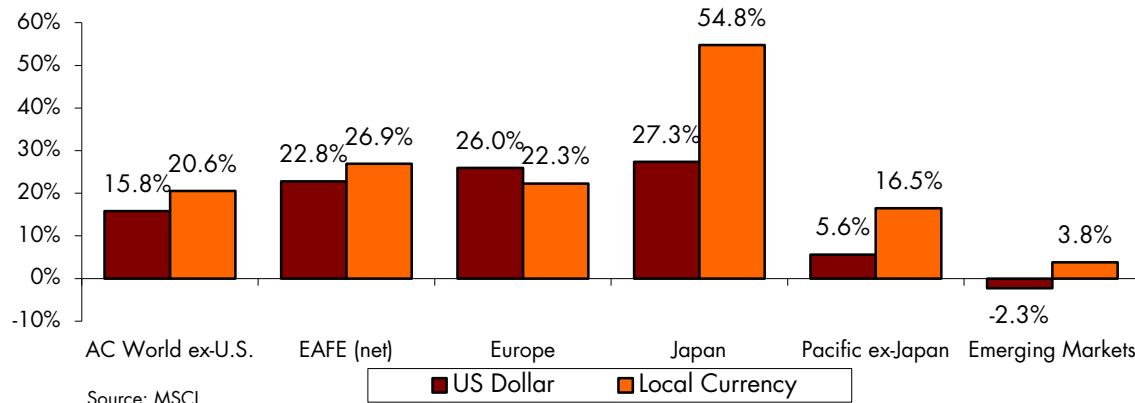

Multiple expansions drove the majority of 2013 US equity market performance. The question moving into 2014 will be the degree to which an apparent improvement in economic growth will support current equity valuations.

International Equity Markets

MSCI Indexes: Calendar Year 2013

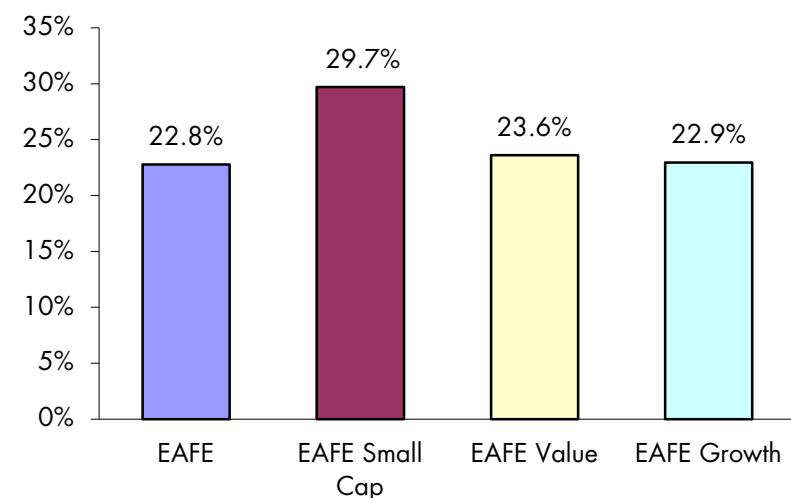

Developed International markets posed strong returns in 2013, as the EAFE Index appreciated by 22.8% in USD. Emerging Markets lagged during the year, losing 2.3% in USD terms. Central Bank Policy among developed countries in large part drove global equity markets in 2013. Japanese quantitative easing - "Abenomics" drove significant Japanese equity market performance in 2013, as Japan appreciated by almost 55% for the year. Significant Yen depreciation offset roughly half of this gain in USD. Additionally, the prospect for tightening US monetary policy had a significant impact on global equity returns, most notably in Emerging Markets. Broad USD appreciation relative to several EM countries negatively impacted performance, with notable losses in India, Indonesia, Brazil, Turkey and South Africa, all of which suffered FX losses of more than 10% relative to USD.

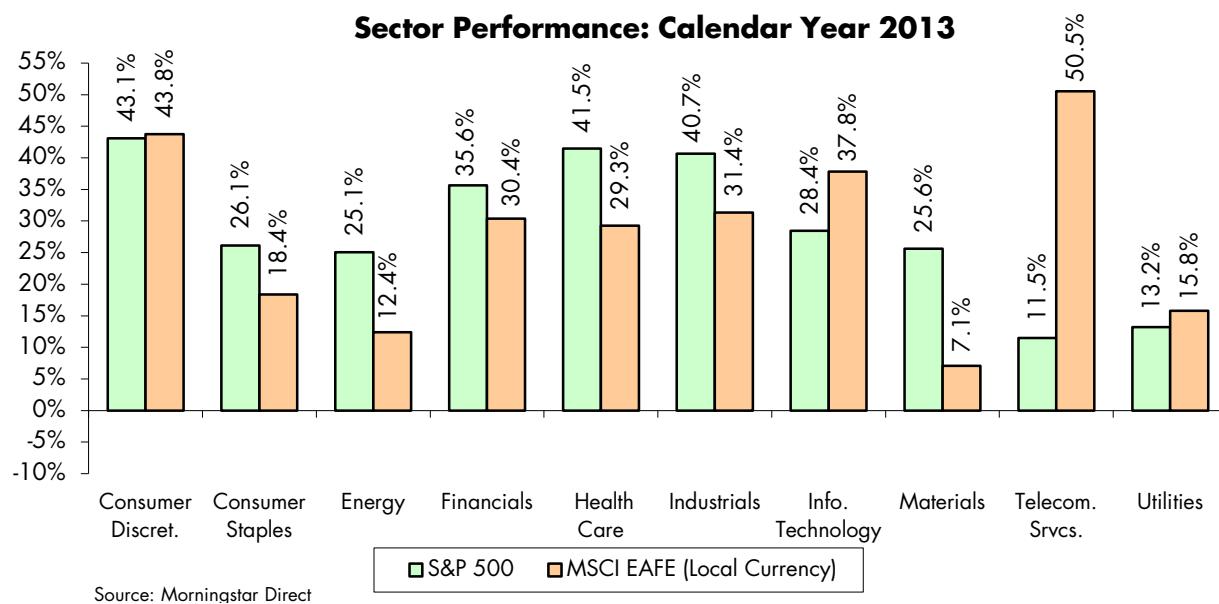

Economic growth trends drove 2013 market performance as well. An apparent uptick in GDP growth in Japan and the eurozone contributed to positive performance for the MSCI EAFE Index. Conversely concerns about Chinese economic growth weighed on performance, as investors evaluated China's ability to re-orient its economy weighed on

Small Cap International stocks out – performed their larger counter-parts.

(Returns in US Dollars)**

Equity Sectors

Stocks rallied strongly in 2013 as almost all sectors detailed above posted double – digit returns. Cyclically – oriented companies out – performed during the year, as the prospect for improving economic growth drove equities higher. Consumer Discretionary was the top performing sector within the S&P 500 and EAFE Indices, appreciating by over 43% in 2013.

The Financials sector was the largest contributor to both S&P 500 and EAFE performance in 2013. Within the S&P 500, JP Morgan and Wells Fargo both appreciated by 36.7% in 2013 and were among the top five single name contributors to Index performance.

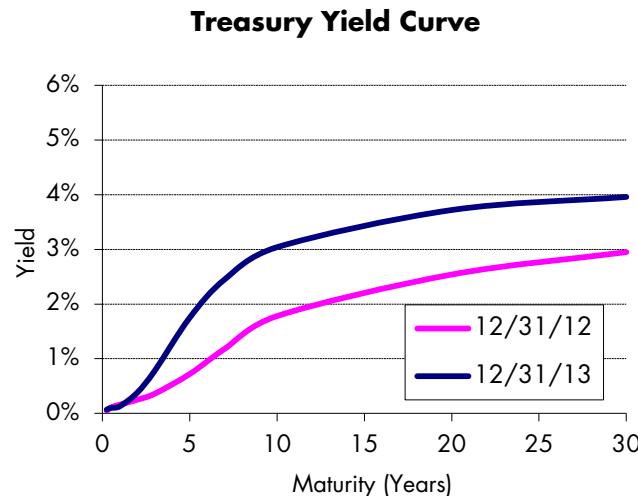

Other cyclically – oriented sectors also performed well, notably including Industrials and Health Care. Within the EAFE Index, health care holdings in Roche and Novartis were among the top 5 single name contributors to performance.

Traditionally defensive sectors in the US lagged, as Telecom Services and Utilities posted the weakest returns. Though EAFE Utilities also tended to lag, EAFE Telecom Services appreciated by over 50% for the year. EAFE Telecom performance was driven by the performance of Vodafone Group, Plc, which was the largest single name contributor to EAFE performance during 2013.

US Information Technology, though strong in absolute returns, lagged the S&P 500. Apple, one of the largest constituents in the S&P 500, appreciated by only 8.1% during the year, detracting from relative performance.

Fixed Income Markets

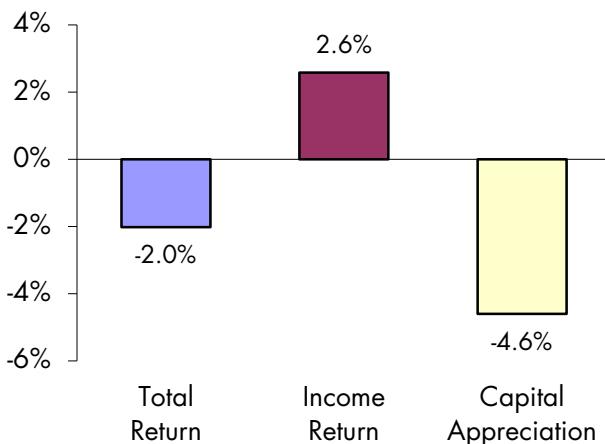

Treasury yields rose steadily in 2013 as 10 Year Treasury yields rose over 1.25% during the year. Fed Chairman Bernanke's suggestion in May that the Fed would taper mortgage bond purchases led to a substantial increase in rates. Action was most pronounced during the 2nd quarter as 10 year yields began to rise from 1.6% to 3.0% at year – end. After months of speculation, the Fed voted to begin tapering purchases in December, reducing monthly bond mortgage purchases from \$85 billion to \$75 billion per month amid limited market reaction.

Source: US Treasury Department

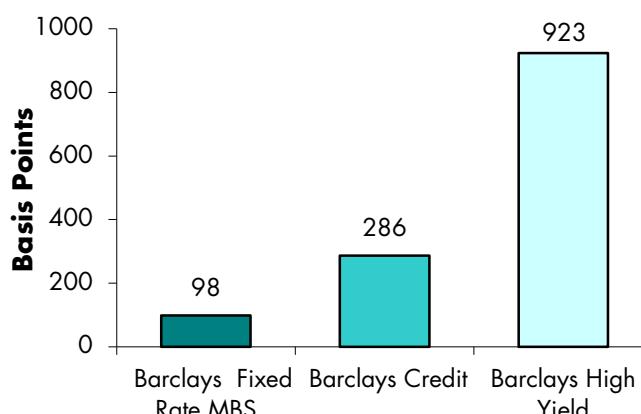

Treasuries were among the poorest performing securities during the year. Long – duration nominal Treasuries (>10 year) lost more than 10% during the year, and inflation – adjusted Treasuries (TIPs) in particular were poor performers, as the Barclays U.S. TIPs Index lost 8.6%. Spread compression generally offset rising interest rates as spread sectors generally out – performed. Investment Grade Fixed income sector performance was largely negative, whereas high yield sectors generally earned positive returns. To provide some context, The Barclays U.S. Corporate Investment Grade Index lost 1.5% for the year. Conversely, The Barclays High Yield Bond and Barclays High Yield Loan Indexes posted positive returns, earning 7.4% and 5.4%, respectively for the year.

Real Estate Markets

The private commercial real estate return, measured by the NCREIF Property Index (National Council of Real Estate Investment Fiduciaries) produced a good year of returns at 11% with roughly half coming from income and half from appreciation.

Fundamentals during the fourth quarter reversed third quarter results. Occupancy rates in the index properties decreased while Net Operating Income (NOI) growth turned positive. The decline in occupancy was most evident in the Hotel and Apartment sectors.

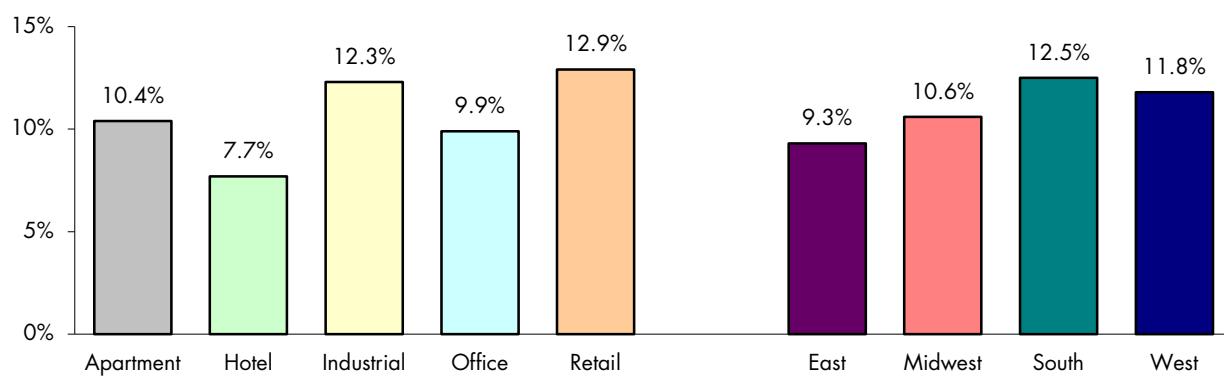

**NCREIF Property Index Returns:
Calendar Year 2013**

Returns are preliminary. Source: NCREIF

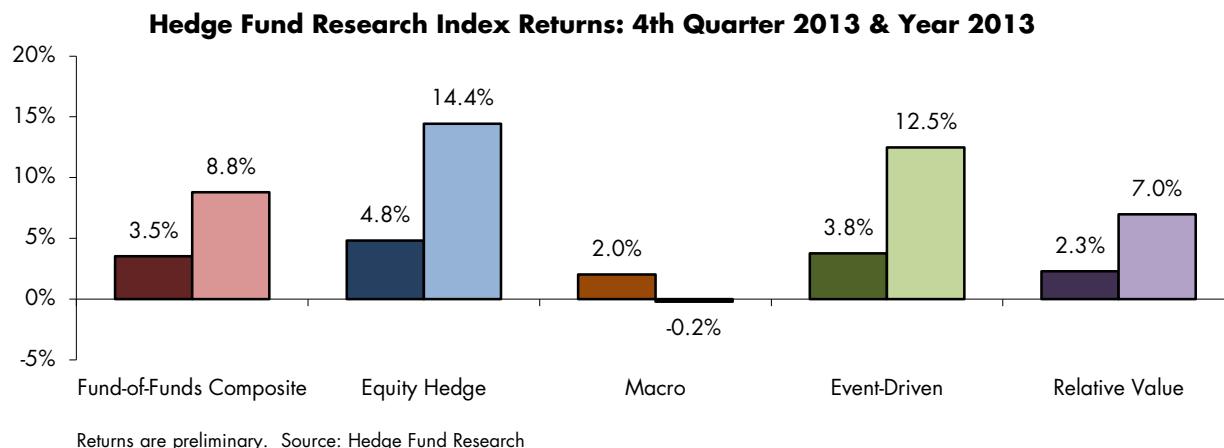

For the year, the Retail and Industrials sectors led results. NOI growth in Retail was strong the last three quarters of 2013. Regionally the South provided the highest returns while the East, with a slowdown in the Washington DC area, produced the lowest returns.

Returns are preliminary. Source: NCREIF

Hedge Fund Strategies

The HFRI Fund of Funds Composite Index appreciated by 3.5% during the quarter, ending the year with a gain of 8.8%. Directionally – oriented strategies were among the best performing for the year, as the Equity Hedge and Event Driven indexes posted double – digit returns for the year. Though hedged strategies were positive, they generally lagged long – only strategies as risk assets rallied strongly.

The Equity Hedge Index posted a 4.8% return during the 4th quarter, bringing 2013 returns to 14.4%. Equity Long/Short funds have performed well relative to other hedged strategies, driven by strong performance within equity markets. Managers appeared to earn at or above market returns on long positions, but short positions detracted during the year. Managers suggested that lower quality, highly leveraged companies performed very strongly during the year, impacting the performance on stocks sold short. The tone for managers appears to be positive going forward, as managers noted rising equity valuations and falling stock correlations in 2013, suggesting an improving environment for fundamental stock selection.

Event – Driven and Relative Value strategies posted positive absolute returns during the year. The HFR Distressed Index posted a 14.4% return during the year, as several large, high profile corporate distressed positions appreciated. Returns within RBMS and CMBS strategies posted positive returns, as real estate fundamentals improved in 2013. Moving forward, managers suggest that they expect 2014 to be relatively benign; an environment in which security selection becomes paramount to performance.

Macro was among the most challenged of strategies in 2013, as the Index lost 0.2%. Managers generally missed the large upswing in equity markets and struggled to perform across FX and Rates markets that reversed dramatically at times during the year.
